Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. Stream was dry. It is listed in 2005 Water Quality Standards as a losing stream. Two tributaries were also dry. ATV tracks and foot prints were noted in the stream bed.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the depth criteria at the only site evaluated. Due to not meeting the depth criteria and being a losing stream, the committee recommends the WBCR use designation be removed. Based on observations of ATV tracks and footprints, the committee also recommends assigning the Secondary Contact Reacreation use.

Committee Recommendation: ☐ Add Use ☐ Retain Use ☒ Remove Use ☐ Modify Use ☐ Inconclusive
